## WESTGATE PROJECT:

Traditional home on narrow sloping lot. This project involves a complete garden renovation which is still in the works. We first began with the wooden deck area in the back which required immediate attention because of erosion potential. Clients like their color to mainly come from foliage so a rich textural planting was done with *Carex elegantissima* variegated, *Heliotrichon sempervirens*, *Phormium 'Golden Ray'*, *Leonotus leonurus*, *Penstemon 'Midnight'*, *Geranium 'Vancouver Centennial'*. Between and around the flagstone steps we tucked in *Sedum anglicum*, *Sedum spurium* and various *Echeveria*.
